

[Vincenzo Ferme](#) (@VincenzoFerme) is Chief Technology Officer (CTO) at [Kiratech S.p.A., Kiratech Swiss SA](#). He has been awarded his degrees in Informatics by the [University of Federico II](#), Naples in 2010 (bachelor, summa cum laude), the [University Milano-Bicocca](#), Milan in 2013 (master, summa cum laude) and the [Università della Svizzera italiana](#), Lugano in 2021 (PhD). His PhD thesis titled “Declarative Performance Testing Automation - Automating Performance Testing for the DevOps Era” focused on performance testing automation models and techniques for automating declarative performance tests execution.

Before starting his PhD he was a Software Engineer and Java Developer at [Connexun S.r.l.](#) for one year, where he implemented a software system to discover and identify Points of Interest relevant to cross-cultural communities through data analysis and semantic techniques.

Currently he is CTO, supporting the growth and development of a talented team working on transforming companies towards a Cloud Native future. He contributes to the quality, competitiveness, and success of Kiratech's technology and proposition, relying on data analysed by greater minds. He fosters open communication and constructive feedback to build a trustworthy and accountable team.
